What is a Corpus?

“A collection of linguistic data, either written texts or a transcription of recorded speech, which can be used as a starting-point of linguistic description or as a means of verifying hypotheses about a language.”

David Crystal, *A Dictionary of Linguistics and Phonetics*, Blackwell, 3rd Edition, 1991.

Chosen how?

“There is no consensus in the community as to the procedures to be followed in corpus design (balanced, opportunistic, statistically sophisticated and defiantly naive approaches all struggle with each other for acceptance) [...]”

C.M. Sperberg-McQueen (1994)

Leech (1992)

A01 4 P4 MOVE to stop OMr. Gaiskell from nominating any more Labour

A01 6 IOMr. Michael Foot has put down a resolution on the subject and
A01 7 he is to be backed by IOMr. Wil Griffiths. (OM P) for Manchester

A01 9 IThough they may gather some Left-wing support, a large majority

A01 12 "<*>ABOLISH LORDS">
A01 13 IOMr. Foot's line will be that as Labour (OM P)s opposed the
A01 14 Government Bill which brought life peers into existence, they should
A01 15 not now put forward nominees.
A01 16 IHe believes that the House of Lords should be abolished and that
A01 17 Labour should not take any steps which would appear to "prop up" an

A01 19 ISince 1958, 13 Labour life Peers and Peeresses have been created.
A01 20 IMost Labour sentiment would still favour the abolition of the

Corpus Linguistics

Corpus Linguistics

- The study of language through corpus-based research, but it differs from traditional linguistics in its insistence on the systematic study of authentic examples of language in use.
 - Text linguistics vs Corpus Linguistics
 - Illustration vs Evidence
 - Introspection and Informant Testing vs Observation of Text

Methodological Issues

- Is the Corpus large enough to answer the question?
- Is the Corpus representative?
 - What were the sampling procedures?
- Is the transcription (or annotation) reliable?
- Is the study design sound?
